RECOVERY PLAN UNDER-PERFORMING INDICATOR

Q3 2019/20

Plan12 – Processing of planning applications: Major applications

INDICATOR NAME

CURRENT PERFORMANCE

Outturn	47%
Target	65%

HISTORIC PERFORMANCE

	Q3 2018/19	Q4 2018/19	Q1 2019/20	Q2 2019/20
Outturn	58%	74%	60%	71%
Target	65%	65%	65%	65%

REASONS FOR CURRENT UNDERPERFORMANCE

This fell below the target due to the significant number (comparatively) of Section 106 agreements completed and permissions issued compared to those major applications dealt with under delegated powers.

This is considered to be part of the natural variation of major application timescales and not indicative of a particular trend.

PROPOSED ACTIONS TO CORRECT UNDERPERFORMANCE (OR REASONS WHY NO ACTION NECESSARY)

No particular actions necessary, although a new Principal Planning Officer has started, which will spread the load of the major applications wider and will help with the efficient determining of these applications.
