Subject: FW: Colebrook Application - 7th September
Importance: High

Dear Robin,

I have my portable office with me!! Perils of being a Sole Practitioner. To assist I have drafted up the following wording that I think covers what we are trying to achieve. Feel free to suggest any amendments to achieve a unique solution because of the exceptional circumstances we find ourselves in.

Because of the intervention of the Covid 19 pandemic the application for variation of the licence be amended to enable the Premises Licence Holder to run two large events in 2021(i.e. for persons between 1500 and 4999 over a period of three days) to enable the Environmental Health Department to carry out proper testing of the noise management plan prepared by SPL Track and provide live data to the committee to so that the Premises Licence Holder can show how it can work in respect of the application for a permanent variation of the licence and meet the concerns raised in the representations.

On the Friday and Saturday of one of the events the terminal hour for the provision of live and all recorded music would be 4 AM and on the other event the terminal hour for the provision of live and or recording the music would be 3 AM. During the course of the testing EHO wish to carry out noise management testing in the light of further developments to exclude the requirement that music be provided in a marquee after 23:00 hours and revisit the question of the definition of "indoors" when applied to a marquee as currently provided under the existing licence.

These events will replace 1 Category 1 event and 1 Category 2 event otherwise all existing conditions of the licence will continue to apply for 2021.

The application for permanent variation be adjourned to a set date in October 2021 to enable all parties to consider the data collected when the application for a permanent variation will then be considered

Best
Stephen
